

VILLA BIANCA

SERVICES CHARTER

The first goal of our private clinic is to establish an immediate and fair human relationship, and offer you the best of our professional skills and our cutting-edge technologies.

Over half a century of orthopedics practiced with dedication and professionalism, continual innovation in our equipment, surgical techniques, qualifications and further training for our employees: every single thing we have achieved so far has been designed for the sole recipient of our work, the patient.

Hundreds of patients every year recognize our effectiveness and reliability.

Villa Bianca is more than an ordinary hospital, and this makes us particularly proud.

Dr Pietro Galluccio, President

Dr Elena Galluccio, Vice President

Villa Bianca is a private clinic operating with the national health service. Founded in 1955 by Dr Domenico Galluccio, it soon became a reference point at both local and regional levels. Over time, other branches of medicine were added to complement orthopedics to offer complete medical care, attentive to patients' needs.

Services Charter was created in compliance with the Prime Ministerial Decree of 19 May 1995.

Examined and approved on 16/06/2022 by Codacons Lecce

INFORMATION FOR THE PROCESSING OF PERSONAL DATA

Data controller of the personal data processing:

Sint.El. S.r.L. in the person of Legal Representative

Sint.El. S.r.L. has appointed a Data Protection Officer to verify the conformity of the processing of personal data with Italian and European legislation, which can be contacted at the e-mail address dpo@villabianca.org or at contact details of the Data Protection Officer.

MISSION e VISION

MISSION

Nursing Home provides health services also on behalf of the Public Health Service, through programs and actions consistent with the principles and objectives indicated by national and regional health planning. In this context, information, regulated by constant and systematic flows through appropriate tools, the continuous training of human resources engaged in production-delivery processes at all levels, the search for participation in the development of strategies, objectives and programs and the sharing of projects constitute inseparable points of reference for management and permeate the executive actions

and behaviors of the organization. Similarly, attention to the needs of human resources and the use of appropriate development strategies, supported by adequate projects, programs, tools and resources, represent a commitment to the company structure in view of the necessary involvement of professionals, operators and collaborators in programs aimed at management objectives.

Light of the foregoing, the additional guidelines to which the Company inspires management action are enumerated:

- respect for human dignity, equity and professional ethics;
- the centrality of the person, meant as an autonomous, responsible and capable individual identity and the constant reference to the local community;
- the clinical-assistance quality, appropriateness, involvement and continuous qualification of human resources, to be supported through permanent training and updating programs, aimed at changing and adapting the company system;
- the compatibility between the resources assigned and the cost of the services offered, according to cost-effectiveness criteria, on the basis of scientific evidence and within the levels of assistance, identified by the Regional Health Plan;
- the diffusion of assistance, to ensure in a generalized and coordinated way the protection and promotion of health, the prevention, diagnosis and treatment of diseases, the rehabilitation of patients, assistance to suffering and disabled people. To be developed in conditions of safety, effectiveness and quality to accentuate the level of humanization of assistance.

The Company meets the health needs of the population through specific health interventions within the care system, directly organizing, or acquiring from public or other accredited private facilities, the health services and services essential to appropriately meet the demand expressed by these needs. It is the Company's task to promote and guarantee the participation in its activities of individual citizens and their associations, in compliance with current regulations. The Company's action is inspired by criteria of efficacy- appropriateness, efficiency, equity, professionalism, in a logic of continuous improvement and in a framework of compatibility with available resources. It is bound to the transparency principle and in this sense makes visible and certain the commitments of the organization and the related guarantees through the use of appropriate tools.

VISION

The Company's strategy is oriented to:

- qualify the offer of clinical-assistance actions, developing the ability to identify health needs and evaluate the outcomes of the action carried out;
- strengthen the clinical - care offer, according to the health priorities of the population and compatible with the indications and limits set by the regional health and the Lecce ASL;
- innovate and differentiate the clinical-care offer, activating increasing levels of specialization of the same service;
- pursue the guidelines and the methodologies of clinical governance, as a tool to translate into clinical setting EBM issues, appropriateness and efficacy
- strengthen innovate and differentiate the clinical-care offer, activating increasing levels of specialization of the same service;

- The Company, through its short, medium and long-term planning tools, it aims to collaborate with external subjects operating within the regional health system, in a strategic logic of integration between the services offered and mutual improvement.

For further information on our surgeons: <http://www.villabianca.org>

Types of treatments

Treatments in agreement

The Nursing Home is accredited with the NHS for hospitalization and outpatient services.

Inpatient Services: Each service during hospitalization in Orthopaedics department is entirely at the expense of NHS and do not require payment of any prescription charge.

Outpatient Surgery Services: This kind of service (e.g. carpal tunnel and tarsal tunnel release surgery, hammer toe surgery, knee arthroscopy etc.) require non-exempt patients to pay a prescription charge (for further information on prescription charge exemption, check www.sanita.puglia.it or www.regione.puglia.it)

National Health Service funded outpatient treatments

For all services, a medical prescription is required. It must be drawn up by your doctor, with all parts of the form completed:

- Orthopedics (Orthopedic visit, Arthrocentesis and infiltration, Plaster cast or splint application and/or removal, Bandage application);
- Instrumental diagnostics (conventional radiology, electromyography, CAT scans, musculoskeletal ultrasound, internal ultrasound, Doppler ultrasound TSA, bone densitometry).

Private Treatment

Several treatments in Villa Bianca clinics are provided on a fee basis: some because the national health service still does not cover them; others because Villa Bianca has an agreement only for some specialist branches.

All the health service-covered services are also provided privately. To check the active agreements between Villa Bianca and the main insurance companies or health care funds, visit

www.villabianca.org/assicurazioni-e-convenzioni

Hospitalization

Unscheduled Hospitalization

Anyone can access our facility following a trauma, an accident or a work accident, after orthopedic evaluation and confirmation of bed availability (for further information contact the clinic switchboard)

This type of hospitalization is also provided in agreement with the NHS

Scheduled Hospitalization

A medical examination from one of our specialists is always necessary before hospitalization. Then, the patient who needs surgery will be put on a waiting list, managed in line with regional and national regulations. Chronological order is followed but priority will be given to any urgent cases reported by the proposing specialist. If the patient is insured, the Admissions Office will carry out the paperwork required by the relevant agreement (all active agreements can be consulted at the address www.villabianca.org/assicurazioni-e-convenzioni).

Pre-Hospitalization

A few days before the surgery, you will go to the private clinic for pre-hospitalization which may involve various specialist consultations. You will need to be fasting and to respect the schedule arranged with the clinic staff. You will need to bring your health card, a valid identity card, a sample of morning urine in a sterile container (only for major surgeries), all your health documentation (reports of laboratory tests or instrumental investigations, medical records of previous admissions etc.) and a up-to-date list of all medications you are currently taking. (For further information contact the Admissions office on 0832-233312, from Monday to Friday, from 8.30 to 15.30).

The Day of Hospitalization

On hospitalization day you will need to be fasting, and to bring with you your health card, a valid identity card and your GP's referral for the hospitalization.

After admission, you will undergo further medical assessments (only for major surgery). Before each intervention, you will be asked to carefully read and sign information and permission forms concerning the diagnostic investigations and therapeutic procedures that you will undergo, as well as about the risks associated with those procedures, and possible alternative treatments. Later you will be taken to your assigned hospital room, waiting to go to the operating room.

You should bring to the clinic a pair of pajamas (for men) or a nightgown (for women), which can be opened from the front. You should also bring a spare nightgown or pajamas, a dressing gown, a pair of slippers, underclothes and toiletries.

RECOVERY

General Visiting Hours

Every day from 11:30 to 14.30 and from 16.30 to 20.00.

(Visits are suspended during the Covid emergency period)

Rules for Patients

To help both their own recovery and the work of the staff, patients are required to respect some simple rules:

- do collaborate with the healthcare personnel of the clinic;
- do not smoke in all interior spaces;
- do not take medicines yourself without informing your ward physician;
- do inform the nurse or ward physician when leaving the room for a long period;
- respect the needs of others: don't shout; don't use your mobile phone in the hospital rooms; keep the TV volume low.
- The custody of precious personal property by the clinic can only take place upon explicit request. Contact the Head Nurse

The hospitalization period at the Nursing Home is one of the most important moments for the recovery of his health. Dialogue between patient and medical staff and mutual trust are fundamental values for us, as are technical and professional competence.

Rights and Duties

The identity, function and role of our staff is always recognizable by an identification badge that each of us wears. Our uniforms are differentiated by role and qualification. Our guest is treated with respect, his beliefs are respected, his intimacy is protected as much as his tranquility. Respect for private life is guaranteed to all hospitalized patients, as well as the confidentiality of personal, medical and social information concerning him. Except in cases of urgency, any surgical intervention or anaesthesiological procedure, any blood transfusion cannot be performed without the free and manifest consent of the patient.

patient has access to the health information contained in his or her record. The patient has the right to express his observations on the care and reception received. Doctors and nurses are required to provide the patient with all the information within their competence, in a complete and understandable manner. The patient participates in the therapeutic choices that involve him. Every morning at the end of the wards tour one of our specialists is available to provide, only to family members authorized by the same patient, useful information on hospitalization.

The Head Physician, Dr Pietro Galluccio, is available for information or communications by appointment with the Executive Secretary – **Phone number: 0832-233317**

For any need, suggestion or complaint, do not hesitate to contact our Head of the Public Relations Office also by phone at **0832-233375**

Accommodation Comfort

The hospital rooms have 1, 2, 3 or 4 beds. All rooms are equipped with private bathroom, television, call device, intercom with the ward infirmary, individual light and air conditioning. Any conditions of greater accommodation (single room, availability of the second bed for the companion etc) are borne by patients when requested and if available. For info on costs contact the Admissions Office at number 0832.233312.

Rules for visitors

Please show respect for the other patients in the room: avoid crowding the room; speak quietly; don't bring in drinks or food; don't sit on wheelchairs and beds, even if empty; don't go into other rooms or use the patients' toilet (visitors' toilets are in the basement). Children under the age of 12 are not encouraged in the ward.

In the interest of patients, we advise visitors suffering from coughs, colds or other infectious diseases against visiting the clinic.

Discharge

Discharges usually take place in the morning after the ward round. The healthcare staff will inform you at least one day beforehand. You will be given a discharge summary, containing information on the assessments and the care provided, the surgery performed, a new treatment plan, the schedule of outpatient check-ups and any further rehabilitation required. You must show this to your GP and bring it with to any further appointments.

Rehabilitation

Rehabilitation is an integral part of the healing process. Villa Bianca offers a complete solution with innovative technologies and customized treatments.

The rehabilitation treatments can be carried out:

- in the Inpatient Rehabilitation Department of the clinic;
- in the Outpatient Clinic, at the Galeno Institute (Via del Lavoro, 20, Brindisi; phone 0831-587866)
- there are agreements with local healthcare facilities, for info contact the Office or the Department.

General Services

None of the services provides for a surcharge: the costs of each if applicable, will be at the rate charged by the operator of the external service. These are displayed on the bulletin boards of the departments.

Assistance of a cultural interpreter / mediator upon request (free);

Night assistance - Supplementary assistance: Night or supplementary assistance is available on request. These will be qualified personnel not employed in the clinic. The assistance of a family member is allowed provided it has been authorized by the clinic management.

Religious assistance: Christian-Catholic or other religions (free).

Delivery of the main Italian newspapers and periodicals: upon telephone reservation, these can be
Rehabilitation aids: through our agreement with Sanitaria Villa Bianca, it's possible to purchase or rent various equipment at a discounted rate for Villa Bianca patients. These include walking aids, orthopedic beds, anti-decubitus aids and electro-medical equipment lifters, braces, orthopedic shoes.

Safekeeping of valuables or money in our safety deposit boxes (free).

Ticket payment in cash or by ATM: postal service and bank branches are near the clinic: Banca Popolare Pugliese, Viale Marche n. 11/B; Poste Italiane post office, Viale Marche n. 21/c; Banco di Napoli, Via Leuca n. 174/a;

Hairdresser on request (for further information: HairZone Parrucchieri, phone 0832/349056);

Agreement with hotels/B&B: relatives of hospitalized patients can stay at the Hotel Delle Palme, or the Eos Hotel, or the B&B Villa Liberty near the clinic. For further information call the Admissions Office at 0832-233312;

Ambulance agreement: for further information and costs phone Croce Gialla, 0832-711498 or 328-7045280;

Copies of clinical charts or x-rays: these can be requested by using the application form available online. Usually x-rays take an average of three days; the clinical chart will be available within 30 days of the application, as required by the Italian law (law 8 March 2017, n. 24, art. 4, paragraph 2). For further information on procedures and costs, contact the DRG Office at 0832.233316 or visit the website <https://www.villabianca.org/richiesta-copia-cartella-clinica/>;

Sanitation and laundry: the service is entrusted to specialized operators. Cleaning in hospital rooms and toilets is ensured twice a day. Linen is changed daily, except for specific needs

Food service: food service is entrusted to carefully selected external companies. Meals are served in the patient rooms, on personalized trays, at the following times:

- Breakfast: 7.30 am.
- Lunch: 12 pm.
- Dinner: 6.30 pm.

Each patient can choose a customized menu among various alternatives that take into account food needs, allergies or intolerances, religious or ethical choices.

The agreement with Estia Banqueting Company is also active for the consumption of meals inside the restaurant, located in via Leuca, 90, and reserves advantageous packages for patients of the Nursing Home.

Bar Agreement: There are also vending machines in the basement and on the first floor of the clinic. For other needs it is possible to book by telephone, and at no added cost, from the following cafés affiliated with Villa Bianca:

- Bar Massimo 0832-349910
- Bar Titanic 0832-343489

X-ray and other reports: normally x-rays can be collected on average 3 days after the exam. Reports can be collected from Monday to Friday from 17:00 to 19:00. The summer schedule may be subject to change; for more information contact the clinic)

Reports of outpatient visits and ultrasound examinations are normally available immediately.

Civil Rights

The Villa Bianca group facilities grant the "civil rights" recognized in Article 14 of Legislative Decree 502/92 and subsequent amendments, extending them to all citizens of any nationality, ethnicity and religion.

These legislative prescriptions identify the right to personalized and humane treatment, the right to information, and "hotel services" as important factors in measuring the quality of services.

The same rules provide for the citizen's right to complain against any acts or behavior that deny or limit the usability of health care services.

The Public Relations Office, responsible for handling any complaints, is available to users from Monday to Friday, from 9:00 to 18:00 (contact the clinic for the scheduled times on summer).

Complaints and suggestions can be made verbally or written on plain paper.

Or patients can download a form for Disservice/Complaint/Suggestion from the clinic website (Customer Care - Urp section) and send it by email to urp@villabianca.org or by regular mail to the Villa Bianca, Via Leuca 133, 73100 - Lecce.

The Public Relations Office will reply, either in person or in writing, within thirty days after receiving the complaint.

We also welcome feedback to help us develop improvement strategies. We ask all patients to complete the assessment questionnaires available in the waiting rooms and on the wards.

Quality Standards

Villa Bianca's purpose is providing high quality and highly specialized diagnostic and therapeutic services, both in hospital and in outpatient settings, in order to constantly improve:

- the effectiveness of care
- the human approach to giving assistance
- scientific innovation
- continuous training and professional updating of employees
- coordination with local specialists and GPs.

By making high professionalism and service quality its added value, Villa Bianca is committed to satisfying patients by providing punctual, efficient and reliable services, in compliance with the fundamental requirements of its quality policy.

Quality Indicator	Quality Standard
Waiting times	30 days for radiology; 30 days for orthopedics visits
Hygiene of the rooms	To ensure the correct standards of sanitization and sterilization, every surface of the rooms of the Nursing Home is sanitized and sterilized in depth
Information – accomodation - politeness	Quality standards relating to information, accomodation and politeness are monitored through: creation of a questionnaire on patient satisfaction - 95% satisfaction; number of well-founded complaints received (max 7/year).
Efficacy of the cure	Evaluation of the correct protocols application: 98%
Humanization of assistance	Promote policies of assistance and need for information, with care paths close to the person, safe, welcoming, participating in regional humanization evaluation programs. - score above 80/100 in regional programs
Continous education and professional updating of operators	Updating courses organized for a total of 20 hours per year per operator
Coordination with local specialists and primary care physicians	effective growth in prescription quality and appropriateness: better interface between GPs and doctors of the Facility (number of complete prescriptions / total prescriptions = 95%)

Safety and protection during the Covid-19 Health Emergency

Measures to prevent, contrast and contain the epidemiological emergency from Covid-19

As the only access route to the structure was identified the entrance from Via Leuca n.135 (ward entrance), with exit from Via Leuca n. 133. Access to the structure, during opening hours to the public, is manned by an operator in charge of carrying out the Triage. Each access to the structure, allowed only if the body temperature detected by thermo-scanner is below 37.5 ° C and if equipped with a surgical mask, requires the compilation of a self-certification with which the user declares the absence, in the last 14 days, of symptoms of acute respiratory infection, even mild and close contact with suspected / probable / confirmed cases of COVID19, the origin from states and regions at risk. For the entire emergency period, access to the facility for outpatient activities is limited to the patient concerned; Only in some cases (minors, disabled, fragile users, not self-sufficient, with linguistic / cultural difficulties) is the triage operator entitled to admit only one companion. The flow of patients within the structure, for pre-admission / outpatient / administrative activities, is regulated according to the seats available in the waiting room that are managed by an APP developed by the company

and supplied to the triage operator, office operators and outpatient nursing staff. To respect the distance between all waiting subjects, the capacity of the room has been adequately reduced and the possibility of sitting in spaces not allowed has been physically obstructed. For the entire emergency period it is normally forbidden to enter the wards to people who are not hospitalized, but it is the right of the Doctor on Call and the Health Management to admit the Health Management to admit the minimum number of companions / visitors, for special needs and for the shortest possible time. In accordance with the regulatory provisions, access to the structure for scheduled and non-urgent inpatient and day service services is conditional on the execution with a negative result of the nasopharyngeal swab for the search for the SARS-COVID 19 virus, which is carried out in the 48 hours prior to entry into the structure during the pre-hospitalization phase.
